

## 6 Bulb Exposure Unit

The Pin Registration System is used to help line up the art work for multiple colors or duplicating screens. The carrier sheets have holes punched in them for sliding onto the pins. Start by placing one carrier sheet on the pins on one side of the unit or both. Center your vellum sheet (with artwork for color #1 on it) on the glass of the exposure unit and slightly over lapping the carrier sheet. Tape the vellum to the carrier sheet. Now place another carrier sheet or set of sheets over the pins. Line up the next vellum sheet (with artwork for color #2 on it) on top of the 1<sup>st</sup> vellum sheet. Use extra care to line up the artwork and the registration marks exactly. Tape the vellum to the carrier sheet. Do this with all colors. Now remove all carrier sheets from the pins, except for the first one. You are now ready to begin exposing your screens.
